How EVs Can Fit into Your Life

Electric Vehicles (EVs) are fun to drive, offer quick, smooth acceleration, cost less to fuel and maintain, and are easy to charge at home and on the road. If you're considering making the switch here are a few things you should know about driving electric.

EV Owner Testimonials

"I bought an EV for the value, performance, acceleration, and the convenience of fueling your vehicle at home. It's just like charging your mobile phone: every night, when you go to bed, you plug in your EV, and in the morning, it's fully charged and ready to go. That's a huge benefit!" ~ John

"My decision to buy an EV It was all about price, battery range and miles per kilowatts. And when my job decided to install EV charging and offer it free to employees, I was 100 percent in" ~ Marcel

"I feel lucky to be able to drive an EV. Three years ago, I did my research and found an EV that was right for my lifestyle. I'm still finding new things that impress me – it still feels new to me!" ~ Naveen

EV Incentives

Under the Inflation Reduction Act, EV customers can choose to transfer their EV tax credit to the dealership, reducing the purchase price on new and used clean vehicles at the time of sale. For more information, visit [IRS.gov](https://www.irs.gov), click Credit and Deductions, then Clean Energy and Vehicles to stay up to date.

EV Chargers

When traveling longer distances, it is helpful to have a charging plan. While many EVs direct the driver to the nearest charging station when range begins to run low Trip planner apps like [plugshare.com](https://www.plugshare.com) will provide a comprehensive mapping solution for all your road trips.

Sign Up for Newsletter

[Our quarterly EV Newsletter](#) will keep you informed on current EV charging incentives, and regularly explores topics important to EV drivers, including tips on charging, recent case studies, and Ameren Illinois EV programs.

Charge at Home, Save on Fueling Costs

Plan your EV charge time. Ameren Illinois offers a way to fuel your EV when electricity demand is lowest. Enroll and charge during the Preferred Charging Period and save.
